EXPERIENCE

Jr. Software Engineer @ PIXELVEGA

April 2025 - Present

Dhaka - Full Time (Onsite)

- Developed travel focused SaaS CRM platforms for agencies, tour operators, and hospitality businesses, managing bookings, customer records, itineraries, invoicing, and operational workflows.
- Built scalable and responsive frontend applications using React.js, Next.js, JavaScript, TypeScript, Tailwind CSS, and reusable component architecture.
  Developed backend modules, REST APIs, authentication systems, role-based access control, and business logic using Node.js, Nest.js, and PostgreSQL.
- Engineered booking engines, quotation systems, lead management pipelines, customer communication tools, and automated workflow processes.
  Implemented analytics dashboards, real-time reporting systems, KPI tracking, and data visualization tools for operational decision making.
- Optimized application performance through code splitting, lazy loading, caching strategies, database query optimization, and SEO best practices.
  Managed integrations with third-party APIs including payment gateways, email services, maps, and external travel data providers.
- Improved system scalability and reliability for high traffic environments and large booking volumes.
  Collaborated closely with designers, product managers, and stakeholders to convert business requirements into technical solutions and production-ready features.
- Maintained code quality using Git version control,Managed CI/CD Pipelines with docker and Github Actions, reusable coding standards, debugging practices, and agile development workflows.

Full Stack Developer (Freelance)

Sep 2021- Apr 2025

Dhaka - Full Time (Remote)

- Delivered 100+ global projects across SaaS, eCommerce, healthcare, education, and tourism. Built scalable dashboards, admin panels, and booking systems. Developed full stack apps using React, Node, and PostgreSQL. Integrated Stripe, PayPal, CRMs, and APIs and Ensured high client satisfaction and repeat business

SKILLSET

FRONTEND

- Typescript
- React.js
- Next.js
- TailwindCSS
- Bootstrap & Sass
- Redux & Tanstack Query
- GSAP & Framer Motion

BACKEND

- Node.js
- Express.js
- Nest.js

DATABASE & ORM

- PostgreSQL
- MongoDB
- Prisma
- Drizzle
- TypeORM

AI & TOOLS

- Vercel Ai SDK
- Generative & Agentic Ai
- Ollama
- Claude Code
- Aantigravity & Cursor
- Git & Github
- Docker & Github Actions

LATEST PROJECTS

Wattup USA - EV Charging

Live Preview Source Code (private)

- Built a full-stack web platform for EV charging solutions in the USA, enabling property owners to install chargers and users to locate charging stations. Developed a high-performance Next.js application with SEO optimization, dynamic metadata, and responsive UI. Integrated Google Analytics, Google Tag Manager, and third-party services for tracking and marketing insights. Implemented scalable architecture with reusable components, optimized image loading, and production-grade performance for a seamless user experience.

Ai Project Estimator

Live Preview Source Code (private)

- Built a full-stack AI-powered SaaS platform for automated estimation and Product Requirements Document (PRD) generation. Developed a secure multi-role system with authentication, role-based access control, and an admin dashboard for complete user and project management. Designed an AI-driven chat-based workflow that allows users to create, modify, and refine estimations and PRDs through contextual conversations. Implemented project pipeline tracking, sales workflow management, team collaboration features, and persistent chat history per project. Added advanced capabilities such as estimation versioning, search, quick lookup, bulk actions, and AI-assisted document generation with export support. Delivered a scalable, production-ready system optimized for enterprise project planning and team collaboration.

Portfolio - devripon

Live Preview Source Code (private)

- Built a fully dynamic personal portfolio website with an integrated CMS for seamless content management. Developed using Next.js, TypeScript, and PostgreSQL with a scalable and type-safe backend architecture. Implemented custom admin dashboard to manage projects, blogs, and site content without code changes. Designed a responsive, performance-optimized UI with SEO best practices, dynamic routing, and reusable components for easy extensibility. Integrated secure authentication and structured database models for efficient content control and updates.

Reactive Accelerator - Documentation

Live Preview Source Code

- Created a comprehensive Bengali documentation resource for React.js to improve accessibility and learning for native Bengali-speaking developers. The project explains core React concepts in depth, including how React works internally, its rendering behavior, and component-based architecture. Included detailed analysis of React's mental model ("how React thinks"), state management, and reconciliation process. Covered key topics such as best practices, performance optimization, and common mistakes developers should avoid. Designed to serve as a structured learning guide for beginners to intermediate developers, making React.js easier to understand in a localized language.

Full Stack Starter Kit for Community

Source Code

- Developed a production-ready, CLI-based starter kit for building scalable full-stack applications using Next.js 16, Nest.js 11, and Better-Auth. Designed with a shared database session architecture, enabling secure and seamless authentication across decoupled frontend and backend systems without traditional JWT complexity. Built a CLI tool to quickly scaffold projects, improving developer experience and community adoption. Implemented session-based auth with PostgreSQL and Prisma, httpOnly cookie handling, and secure API proxying between Next.js and Nest.js. Structured with strong type safety using TypeScript, Zod, and class-validator, ensuring maintainable and enterprise-grade code architecture.

EDUCATION

MSS in Political Science

National University

2018 - 2019

CERTIFICATION

- Reactive Accelerator Course, **LWS**
- MERN Stack Development, **Coursera.**
- Frontend Domination, **Sheriyans Coding School.**

LANGUAGE

- English (Professional)
- Bengali (Native)
